### **Bypass Setting (working around obstacles)**

This function allows you to program pin movement paths. It is effective for avoiding obstacles and marking a dot in exactly the desired locations.

- 1) Click and draw in the marking area.
- 2) After creating the text field, select "Bypass" icon.
- 3) Edit the pause time as an option (0-60 seconds) and click "OK" button to confirm.
- 4) An 'Square' mark will appear in the marking area.

#### ***Tip: Set the force***

*A dot will be marked with force. No dot will be marked at the force 0.*

### **Contact**

Please contact our distributor if you have an inquiry for operation and malfunction.
